WILLIAM HANDS
BRITISH FURNITURE MAKERS

THE WILLIAM HANDS FINISHES GUIDE

William Hands source only the best materials to manufacture our products: Individually selected and hand finished to the highest standards. We pride ourselves on achieving a luxuriously tactile feel to each and every piece we make that stands as a hallmark for true British craftsmanship at it's very best.

All our veneer and solid timber products are lacquered with a 10% clear (matt) gloss level as standard with the exception of our Band B Oak stains which are finished 5%. For veneered components only - alternative gloss levels of up to 40% (gloss) are available upon request for an additional charge of 2% on each furniture item specified.

Polishing/staining to a customer's own preferred colour can be achieved for an additional charge of 5% on each furniture item specified. Note: in both these cases (if required) a sample colour board will be made in advance of the order to confirm the finish. Our lacquer finish meets the requirements of the FIRA standard 6250:2005 heavy/severe use for horizontal surfaces (excluding kitchen worktops). This lacquer is formulated to provide outstanding resistance to abrasion

and will withstand normal daily use. Please refer to the cleaning instructions provided with the furniture. Please note that scratches will be more apparent on a darker veneered finish and more noticeable on darker painted surfaces.

All our veneers and timbers are sourced sustainably but in some instances we may not be able to offer a full FSC chain of custody. The finishes and veneer colours illustrations shown in this document are a representation and to be used as a guide only. Veneer and solid timber are natural materials, prone to shade and pattern variation.

Please contact a member of our expert team on 01494 524222 for physical samples or for additional advice regarding your veneer and finish requirements.

FINISHES - VENEERS

BAND A
